

October 18, 2018

To Whom it May Concern,

It is my pleasure to write this letter of recommendation for Justin Andersen. I have worked with Justin over the past year as a member of the Educational Technology Specialists team within the Instructional Supports Department of the Canyons School District. I am constantly impressed with his dedication and commitment to education. Justin is a natural leader who approaches problems head-on, and always finds solutions.

Justin is an outstanding educator, as can be seen in his coaching skills and methods. He supports teachers and team members in setting high academic standards and supporting and enhancing those standards with educational tools and scaffolds his coaching so teachers at every level get the support they need to meet the needs of their students. Over this past year I have seen Justin become a leader among his Ed Tech colleagues as well as the teachers, academic coaches, and administrators he has worked with. *(Especially when it comes to training and supporting Canvas.)*

Justin has helped plan for and run various Canvas training sessions in the Canyons School District at the school level and well as the district level. His Canvas trainings have ranged anywhere from basic set up to enhancing instruction using Canvas in a blended learning environment. Justin has been heavily involved in the Canyons School District's Canvas Cookout, which is a two-day event in which teachers attend various Canvas trainings based on their interests and needs.

Justin can train "all things", and does so in an energetic and fun way. Justin's love for Ed Tech is contagious. I have no doubt that he would represent you in a positive and energetic way. Teachers leave his trainings with excitement about what they have just learned, and eager to start using new tools in their classrooms.

If you have any questions, please don't hesitate to contact me.

Sincerely,

Camille Cole
Online Learning Team Lead
